

Stop Tank Leaks

All Types Of Tanks

Prevent Contamination

Suitable for Mining Applications

Conforms To Tank or Ground Movements

Innovative Solutions

## FEATURES

Advantages of a Fabric Solutions Tank Liner:

- all potable tank liner material is certificated to meet required standards*
- made to fit any size or shape of tank*
- can be installed over most existing internal surfaces with little or no preparation*
- cost effective solution for repairing older tanks and even new tank installations*
- will conform to tank or ground movements*
- designed for all styles of tanks including: modular, concrete, steel, poly, fibreglass, concrete block and wooden*
- made in our own factory to your specifications under quality controlled conditions*

Tank liners are a cost effective solutions for any structurally sound tank. Designed to fit most types of tanks, a tank liner provides a flexible and reliable layer of containment, especially where corrosion and contamination is a problem. Tanks liners are also able to conform to significant movement of the tank structure making it far more suitable than any other type of waterproofing finish.

Not only can potable, storm or recycled water be stored, but with the right liner a range of liquids and waste liquids can be accomodated. Ranging from enviromentally friendly 'green' liners for rain harvesting to mining applications including frac tanks.

Tank liners are easy to install and can be fitted to most existing and new tanks, including:

- concrete tanks (cast, insitu or pre-cast)
- flat steel sheet tanks
- corrugated iron tanks
- fibreglass tanks
- concrete block tanks
- and brick or wooden tanks

**waterproof tanks with: internal piers, sumps, weirs, walls with step ins or step outs**

*Suitable for range of commercial uses, there is a liner to suit just about any situation. Manufactured from a wide range of materials, such as:*

- Polyethylene (PE)
- Polypropylene (fPP)
- Polyurethane (TPU)
- Reinforced Polyethylene (RPE)
- Reinforced Polypropylene (RPP)
- Elvaloy, Aeon<sup>®</sup>, XR3<sup>®</sup> and XR5<sup>®</sup>

*FSA are able to match materials to usage requirements*
