“ Long life UV resistant pond liners, suitable for ponds with aquatic and plant life. ”

Pond liners are a cost effective solution to lining ornamental ponds, garden ponds, stylish aquaculture environs and domestic water features. Durapond liners are made from UV resistant, non-toxic materials, that are long lasting and ideal for aquatic life.

A wide range of materials are available, including, but not limited too: Polyethylene (PE), PVC, Polypropylene (PP) and EPDM.

### FEATURES

- Durable and UV resistant
- Prevents pond leakage
- Rejuvenate old ponds
- Affordable alternative to concrete, preformed or molded ponds
- DIY - can be installed by yourself
- Custom made
- Wide range of materials available

### APPLICATIONS

- Ornamental garden ponds
- Stylish aquatic environments
- Suitable for small and large ponds
- Water features
- Aquaponic ponds

A Durapond liner is typically supplied as a flat sheet, with custom options available. Geotextile liner underlays are also available if required to minimise damage to the underside of your liner.
