Utilise empty building space. Out of sight water storage.

During the construction of commercial buildings, there are always little spaces or voids that are of no commercial use. Now these voids can be utilised for the storage of water with a cavity void liner.

Reclaim Wasted Space in Building Cavities:

Turn the wasted space into a productive area by turning it into a water storage area. The use of our flexible liner system allows us to manufacture to any shape or size. Void liners can be installed in almost any space provided there is adequate access for a person to enter, and the area is structurally supported.

FEATURES

- Made to fit any size or shape of cavity
- More flexible than applied coatings and will conform to building movements
- Can be installed over most existing internal surfaces with little or no preparation
- Can incorporate Internal Piers, Sumps, Weirs and Walls with step ins or step outs
- Made in our own factory to your specifications under quality controlled conditions

APPLICATIONS

Common uses include:

- Storage of fire water to service either fire hoses or water sprinkler systems.
- As part of a rainwater collection system.
- Supply gardens, irrigation, laundry and toilet systems
- Cavity liners can be made to store potable drinking water.
